Comprehensive Asset Integrity Management Solutions

Key advantages of working with NXT Group is that this model eliminates subcontractors, removing the issue of margin-on-margin. This, along with the effective utilisation of our multi-skilled teams and simultaneous operations (SIMOPS) between multiple work fronts, all contribute to substantial cost savings for our clients.

We also take pride in our 100% track record of completing all awarded jobs within budget and on schedule. Furthermore, the mitigation of schedule risk is a significant benefit we offer. By having all disciplines in-house, we gain the flexibility to pivot and adjust to delays or opportunities as they arise. This approach allows us to maintain total control over the work window, ensuring that we can allocate and adjust resources seamlessly as needed. This ensures smooth project progression, avoiding costly delays and improving overall project efficiency.

All works are completed with detailed MDR (Manufacturer Data Report) provided at the end of each job, ensuring full traceability and conformance - taking the headache away for our clients.

NXT Group's core focus lies in delivering comprehensive asset integrity management solutions, including the application of protective coatings systems, fireproofing systems, specialised coatings, structural and mechanical repairs, maintenance contracts, and shutdown works. As a multi-disciplined contractor, we offer innovative solutions for complete structural remediation and asset maintenance. In addition to our expertise in asset preservation, we also specialise in structural improvements, and engineered modifications to existing designs. Our highly skilled operators are equipped to respond swiftly to any client needs, including shutdowns, ensuring optimal serviceability and minimal downtime. All our service offerings are driven by a blend of local experience and cutting-edge technology, providing effective, whole-of-life, and value-for-money solutions. As we celebrate 20 years in 2025, NXT Group proudly reflects on two decades of excellence in delivering top-tier asset integrity management solutions.

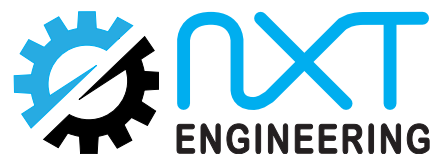

NXT Coatings (previously known as Nukote) has a primary business focus on asset integrity management solutions such as application of high-performance spray-on polyurea, protective coatings systems, acid proofing and other specialised coatings.

Since 2005, NXT Coatings has forged a reputation, most notably in the mining sector, as a professional organisation consistently delivering projects with high standards of service, in a safe and timely manner. NXT Coatings is a multi-disciplined contractor providing innovative solutions for complete structural remediation and asset maintenance. Our multiskilled specialist operators can respond to any immediate client requirements including shutdowns for effective serviceability. We also provide a comprehensive mobile and workshop based abrasive blasting and industrial painting service.

NXT Coatings is the largest applicator of polyurea coatings in Australia, protecting assets with over 3 million litres to date.

NXT Industrial Solutions focuses on complete asset integrity management solutions with a multidisciplined workforce providing innovative solutions for complete structural remediation and asset maintenance including structural integrity management, mechanical and steel repairs, access solutions, industrial coatings, fireproofing systems, shutdown maintenance etc.

NXT Engineering specialises in providing engineering support to advance project delivery and maximise the performance and value of your assets to achieve the full-service capability. Our engineering team is involved in developing custom solutions for our clients involving state of the art structural polyurea solutions, spin cast structural pipe linings and more.

Our Vision

NXT Group prides itself in developing innovative solutions to all our customers. No job is too big or too small as we value in supporting our clients beyond project handover.

Our commitment is to create local opportunity, growth and impact in community by upskilling our employees.

Our Values

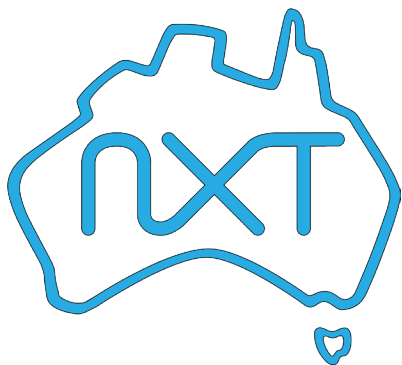

- Diversity & Inclusion – NXT Group practices equal opportunity framework for all recruitments comprising people from different genders, sexual orientations, religions, races, ethnicities, ages, etc. NXT Group's conscious efforts, behaviours, policies and norms are to make every team member heard and values with their unique differences
- Innovation – innovation is part of our everyday life. We innovate to make a difference and maximise our chances of success
- Environment – We take special care in upholding standards of environmental protection in every area of our business. We are proactive and detailed in our compliance with local, state and federal laws
- Excellence – Exceed expectations and take intense pride in everything we do including but not limited to safety and quality
- Integrity – Uphold the highest ethical standards and promote trust and respect

HSEQ Commitment

We are committed to working safely, take care of each other, protecting our communities and respecting the environment.

Our principles:

- Awareness of safety hazards
- Stay informed
- Complete training
- Identify and mitigate unsafe conditions
- Provide efficient equipment for execution of works
- Continuous improvement and innovation

NXT Group provides services across a wide range of industries including Mining, Mineral Processing, Transport, Infrastructure, Water, Oil and Gas, Marine and Construction to provide our clients with single point accountability for asset protection, repair and maintenance. Within each of the above sectors, our core services are asset condition assessment, engineered solution development, repair and ongoing maintenance. This allows our business to work within its core capability and in turn maximise results for our customers.

Services we offer

The Company's core services include:

- Mechanical and structural repairs to core scope execution
- Application of spray on protective polymer coatings
- Industrial anticorrosion solutions
- Membranes and waterproofing
- Acid proofing
- Concrete coatings and/or linings
- Abrasive blasting and painting
- Hazardous coatings removal
- Specialised engineered coatings for steel and other metals
- Asset surveillance and monitoring
- Ultra-high-pressure water blasting/descaling
- NDT testing
- Industrial anti-corrosive solutions
- Structural integrity remediation
- Polymer coatings / acid proofing
- Total tank maintenance
- UHP water jetting
- Material supply and fabrication
- Hydro demolition works
- Pile wrapping and jacketing services
- Timber coatings
- Access systems
- Asset maintenance contracts
- Shutdown maintenance
- Specialised product advises based on NXT Group's extensive experience
- Coating testing including holiday detection, WFT, DFT
- QA QC report preparation and monitoring
- Technical and engineering support
- Asset and shutdown maintenance
- NDT / coating and Inspection
- Robotic Technology
- Custom Engineered Solutions
- Asset condition audits
- Integrity budget management
- Engineering assessments / sign offs

Perth Operations

4/10 Main Street, Osborne Park WA 6017

Kalgoorlie Operations

136/138 West Kalgoorlie Road, West Kalgoorlie WA 6430

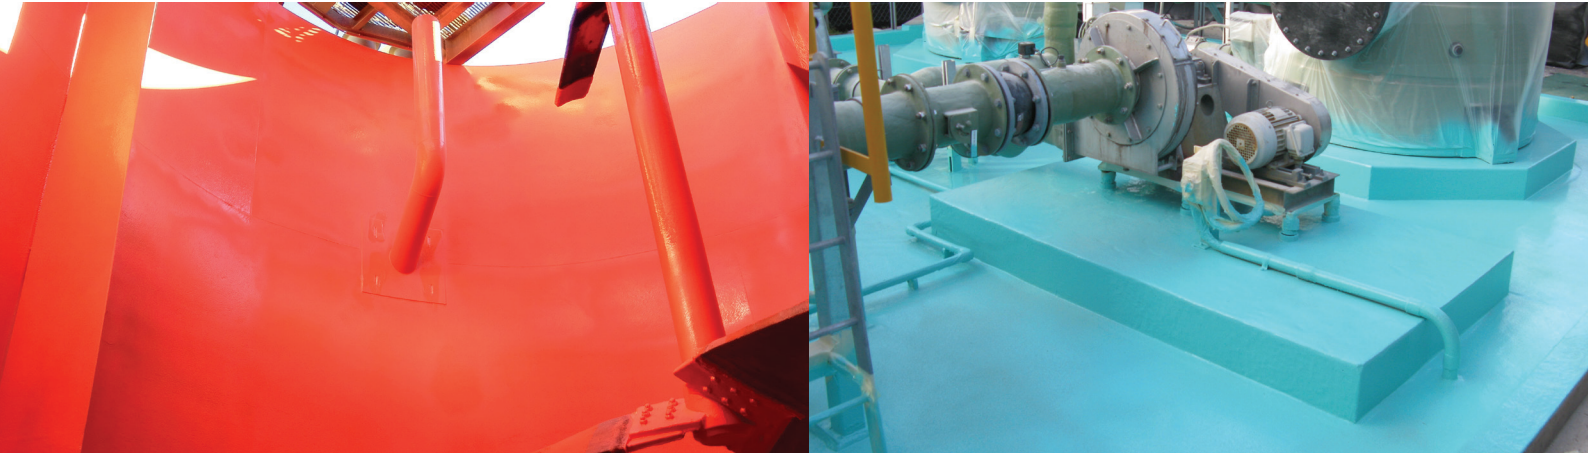

NXT COATINGS

NXT Coatings is the largest applicator of high performance polyurea coatings in Australia. From mining and mineral processing plants to water pipelines to transport and infrastructure, NXT Coatings has the experience to deliver solutions that significantly extends the life of your assets.

Application of Industrial Coatings:

- UHP water blasting
- Abrasive blasting / surface preparation
- Spray application of our own state-of-the-art plural component polymer coatings
- Customised polymer solutions
- Industrial anti-corrosion coatings
- High abrasion resistant solutions
- Fire retardant coatings
- Robotic application technologies
- Acid proofing applications
- Concrete linings
- Waterproofing membranes
- Internal pipe linings

Mineral Processing Specialist Solutions:

Linings for abrasion resistance, corrosion and chemicals for:

- CIL and leach tanks
- Thickeners
- Ball and SAG mills
- Flotation cells
- Launderers, hoppers and chutes
- Trommels
- Agitator blades and shafts
- Containment bund linings
- Tank boot seals

NXT INDUSTRIAL SOLUTIONS

NXT Industrial Solutions is your complete turnkey service provider for your next industrial maintenance or new construction project.

Structural Integrity Execution, including:

- Condition assessments by structural engineer with detailed condition reporting
- Structural material supply, fabrication, and installation
- Surface treatment repair and reinstatement
- Grid-mesh and handrail repairs, modifications, and replacements

Complete Tank Refurbishments IAW API653 including:

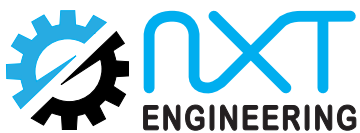

- Launderers, nozzles and manways, baffles, draft tubes and cradles
- Full tank shell stroke repairs and replacements.
- Tank floor repairs and replacements
- Removal and replacement of agitator, drives, shafts and blades as per specification
- Welding and traceability as per approved weld procedures and welder qualifications

- Structural stiffening of compromised tanks
- Specialised polyurea tank lining complete with spark testing and documented quality assurance
- Robotic surface preparation
- External surface treatment of tanks
- Sub-floor soil removal, replacement, compacting
- Boot seal application
- Ring beam repairs and replacements
- Repair/replace top of tank steelworks
- Grid mesh repairs/modifications
- Non-destructive testing on repair works
- Structural integrity remediation execution

UHP Water Jetting

- Removal of existing lining and millscale
- Concrete cutting/demolition

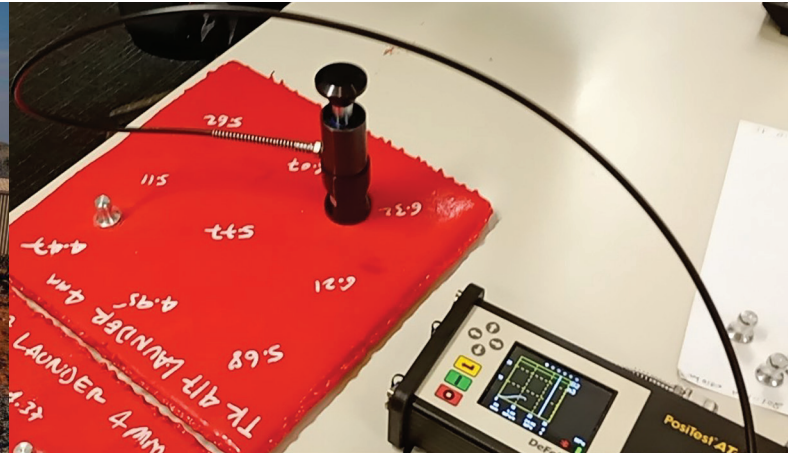

NXT ENGINEERING

NXT Engineering is your partner in industrial and resource infrastructure specialising in providing engineering support to advance project delivery and maximise the performance and value of your assets.

- Engineering assessments / sign offs
- Asset condition surveys
- Integrity budget management
- Custom engineered solutions
- Technical and engineering support
- NDT / coating and inspection
- QA / QC report preparation and monitoring
- NACE inspections / sign offs
